Results Of The Mission And Vision Evaluation Form Of The Department Of Nursing, Faculty Of Health Sciences, KTO Karatay University

A total of 18 participants working in various hospital and university institutions took part in the Mission and Vision Evaluation Form prepared by the Department of Nursing, Faculty of Health Sciences, KTO Karatay University. The participants stated that they predominantly work as academics in their institutions. The mission and vision of the Department of Nursing were found to be appropriate by 16 participants, while 2 participants did not find them appropriate.

When the distribution of participants according to the institutions they work for was examined (n = 18), the highest level of participation was from KTO Karatay University. Of the participants, 27.8% (n = 5) were employed at KTO Karatay University. Selçuk University (including the Department of Nursing, Kulu Faculty of Health Sciences) accounted for 16.7% (n = 3) of the participants. Participants from Malatya Turgut Özal University and Lefke European University were each represented at a rate of 11.1% (n = 2). Kahramanmaraş Sütçü İmam University, Kahramanmaraş İstiklal University, Ondokuz Mayıs University, Osmaniye Korkut Ata University, Necmettin Erbakan University, and Gaziantep University were each represented at a rate of 5.6% (n = 1).

The distribution of participants according to their positions within their institutions (n = 18) is presented below in terms of percentages and frequencies. Of the participants, 44.4% (n = 8) were faculty members (Lecturer/Faculty Member/Academic Staff). The proportion of participants holding the title of Assistant Professor (Dr. Faculty Member) was 5.6% (n = 1). Participants with the titles of Associate Professor or Associate Professor (PhD) accounted for 22.2% (n = 4). Participants working as research assistants and lecturers each constituted 5.6% (n = 1). Regarding administrative roles, 11.1% (n = 2) of the participants were department chairs, while 5.6% (n = 1) served as vice deans.

When the responses of a total of 18 participants were evaluated, the opinions regarding the appropriateness of the Department of Nursing's mission were largely positive. While 88.9% (n = 16) of the participants evaluated the department's mission as appropriate, 11.1% (n = 2) stated that they did not find the mission appropriate.

When the suggestions of the total 18 participants regarding the mission of the Department of Nursing were examined, it was observed that the majority of the opinions did not include any suggestions or indicated that the current mission was considered sufficient. A total of 27.8% (n = 5) of the participants provided suggestions related to revising the wording and content of the

mission statement. These suggestions included revising the concept of “technology” with a more appropriate expression, using the term “monitoring” instead of “keeping up with” technology and innovations, adding an expression emphasizing the ability to use critical thinking processes, and restructuring the mission statement in a clearer, shorter, and more concise manner. In addition, some participants stated that certain elements included in the vision statement could be incorporated into the mission. The remaining 72.2% (n = 13) of the participants either made no suggestions or indicated that the current mission was sufficient by stating “none.”

When the responses of a total of 18 participants were evaluated, the opinions regarding the appropriateness of the Department of Nursing’s vision were largely positive. While 88.9% (n = 16) of the participants evaluated the vision statement as appropriate, 11.1% (n = 2) stated that they did not find the vision appropriate.

When the feedback of a total of 18 participants regarding the vision of the Department of Nursing was examined, it was observed that the majority of the opinions did not include any suggestions, while a limited number of participants provided development suggestions in terms of language, scope, and target level. A total of 16.7% (n = 3) of the participants offered suggestions for improving the vision statement. These suggestions included making the vision statement shorter and more concise; placing a stronger emphasis on care, patient/individual advocacy, and nursing values; expressing certain terms using clearer and more commonly understood Turkish equivalents (e.g., innovative → innovative/forward-looking, qualified → well-equipped/competent); and restructuring the vision to reflect higher, measurable, and more ambitious goals. Some participants also stated that the vision should more clearly articulate long-term goals related to graduates’ academic, professional, and personal development. The remaining 83.3% (n = 15) of the participants either made no suggestions or indicated that they found the current vision statement sufficient by stating “none.”

In line with the suggestions received regarding the Mission of the Department of Nursing, the mission statement was updated as follows: **Mission of the Department of Nursing:** To educate nurses who integrate scientific knowledge, ethical principles, and a humanistic approach through education, research, management, and practice in health care services; who respect human rights and dignity; who monitor technological developments and innovations; who are able to use critical thinking processes; and who can lead future changes and transformations in the field of health care by ensuring continuous development.

In line with the suggestions received regarding the Vision of the Department of Nursing, the vision statement was updated as follows: **Vision of the Department of Nursing:** To be a leading nursing department that shapes the nursing discipline, is focused on lifelong learning, and is nationally and internationally recognized and preferred.
