1: Strongly disagree

2: Disagree

3: Neutral

4: Agree

5: Strongly agree

Among the students who participated in the KTO Karatay University Nursing Department Satisfaction Survey, 26.4% are first-year, 28% are second-year, 24.2% are third-year, and 21.3% are fourth-year students. While 37.3% of students expect the Department Chair to promptly resolve the issues they report, 28.7% consider the social and cultural activities conducted in the department to be sufficient. 27.7% of students believe that the courses in the department curriculum are adequate in terms of practical application, while 27.1% indicate that seminars, conferences, and field trips bringing industry representatives together with students are provided. Additionally, 31.8% express neutrality regarding encouragement to conduct research before moving to the design phase in assigned projects.

While 32.2% of students indicate that they are provided with opportunities to participate in decision-making processes in the department, 36% find the attitude and behavior of the administrative staff toward students to be positive. 31.2% state that the digital equipment provided to students (computers and internet access) is sufficient, and 35% express that classroom capacities are adequate. 31.2% indicate that feedback is provided to students after exams, 31.5% note that instructors recommend a reading list at the beginning of the term, and 34.1% state that instructors act objectively in assessment and evaluation processes. Additionally, 34.1% of students indicate that instructors use various methods and techniques to encourage active participation in courses.

43.9% of students indicate that safety is ensured on campus and within buildings, 46.5% state that the toilets and washbasins are clean, and 51.3% find the cleanliness of classrooms to be adequate. Additionally, 44.9% report that classroom lighting is sufficient, and 33.4% indicate that classroom heating is adequate. 42.4% of students state that instructional technologies, such

as computers and projectors, are used effectively in classes, and 49.4% indicate that instructors provide information about the courses at the beginning of the term.
